Expression of Joy and

Deep Gratitude to "Living Waters for the World," "Holy Spirit Haiti Mission," and "Solar under the Sun"

First of all, I must tell you that I am writing to you with a feeling of immense joy and a relieved heart for the population. I send you warm greetings in the name of our Savior Jesus, on behalf of the congregation and the community of Cap Rouge, which I have the honor of serving.

As stated in bold at the beginning of this letter, this letter is intended to be the perfect expression of the joy of the people of Cap Rouge in general, and of myself and the congregation in particular, and the expression of our deepest and most sincere gratitude to "Living Waters for the World," "Holy Spirit Haiti Mission," and "Solar under the Sun."

Therefore, we express our "special thanks" to you.

Indeed, if we consider the adage that "water is life," I can proudly affirm, thanks to the installation of this treated water system, that you are bringing life to the community. Water, which is in reality a primary need, a basic need, has always been a luxury for the people of this area. Being able to drink a glass of treated water served to distinguish social classes. The situation in Cap Rouge is that people travel for miles with small containers to go to rocky holes in search of water, or they look up to the sky imploring Almighty God in the hope that rain will come and bring water. This description reflects the situation regarding water. This large-scale project illustrates a new beginning. Drinking treated water will soon be appreciated as a normal act, a part of everyday life, and having access to drinking water will be considered the fulfillment of a basic service, one that has been absent since the community's inception.

At the time of the inauguration, the joy was overwhelming. Farmers came from various nearby localities, as did local dignitaries, schoolchildren, teachers, and religious leaders.

All of them, together, formed a united front alongside us, gathering to experience this extraordinary moment in the life of the community. Songs filled the air, laughter and applause resounded throughout the event. Testimonies, words of relief, satisfaction, and gratitude poured from the mouths of the people, both children and adults. They united to send you their heartfelt thanks.

I offer you my deepest gratitude, for you are always there, walking alongside us in the pursuit of well-being for vulnerable people who are often forgotten by the State.

Thanks to the realization of this project, whose main objective is to improve the living conditions of the population of Cap Rouge, several goals will be achieved, such as improving sanitary conditions, guaranteeing access to safe drinking water, and reducing infant mortality and childhood illnesses related to waterborne diseases.

A team is in charge of the system to ensure the effectiveness of the services, the proper management of the system, and its sustainability.

Finally, I sincerely thank you for your interest in contributing to the improvement of the living conditions of the population of the Cap Rouge community. I remain at your disposal in the pursuit of initiatives aimed at life, happiness, and the future.

May God bless you abundantly!
